Marie Antoinette Design in Walnut

All the designs shown in this folder can be furnished in a number of grades of Plain and Quarter Sawed White Oak, Walnut, Brown Gothic Oak, Teak and Dark Red Mahogany.

Colonial Flooring or **Planks** is manufactured in 13/16" thickness, random widths 4" to 12", random lengths 3' to 14', of three-ply laminated or built-up construction, or Solid boards. We use water proof glue in the construction of three-ply planks.

Fontainebleau is constructed of 13/16" thick material in separate pieces for blind nailing, each section being carefully assembled ready for installation. It is especially recommended for large rooms.

Marie Antoinette is produced in 5/16" thickness for face nailing and 13/16" thickness for blind nailing.

Herringbone is produced in 5/16" thickness for face nailing and 13/16" thickness for blind nailing in any width or length desired.

For laying in **Mastic** over concrete floors in buildings of fireproof construction, we furnish Herringbone and Squares milled with special dove-tail grooves.

Detailed information furnished upon request.
